### **WARRANTY FOR THE PRODUCT'S LIFETIME:**

Ajax Tools warrants its products for the lifetime of the products against defects in materials and workmanship. All wear type products will gradually be consumed or wear out over the course of their useful life. Ajax Tools does not warrant that its products will not wear out. Additionally, Ajax Tools does not warrant products that have been misused, used for an improper application, abused, ground, filed, welded or modified in any way. Ajax Tools makes no express or implied warranty as to the suitability or fitness of a product for a specific application

To make a product warranty claim, the product must be returned to Ajax Tools, and prior to shipment must receive a return material authorization (RMA) that is approved by an Ajax Tools representative. In addition, all returns are subject to evaluation by Ajax Tools. If a product is found to be defective, Ajax Tools will repair, replace or issue a credit for the product at the option of Ajax Tools. This is our exclusive remedy to our customers.

**WARNING:** Ajax chisels and punches should never be struck against surfaces that are harder than the tools themselves. i.e. "Bearings" and "Bearing Races" have much higher hardness than the optimum hardness of the working end of all Ajax chisels and punches. There are specific and safer procedures for the removal of these types of items. Follow Certified Mechanic's Resources for the correct applications of tools or contact Ajax Tools for assistance.

**WARNING:** Never use an Extension (Cheater Bar) on any type of Pry Bar. Pry Bars are designed to flex, indicating that the maximum load has been met. If a Pry Bar starts to bend, stop using the bar immediately and use a larger Pry Bar that can safely meet the needed requirements.

**WARNING:** Keep Tools in proper working condition. Discard any striking or struck tools if the face and edges show excessive wear, dents, chips, mushrooming or improper redressing. Mushroomed heads may chip and cause injury. Never redress chisels without the proper redressing instructions.

Each tool supplied by Ajax Tool Works, Inc is designed for a specific job and should be used for that purpose only. Air hammer bits should never be used for prying, and should never be used unless they are in the air or electric hammer.

**Ajax Tool Works, Inc cannot be responsible for injury or damage caused by tools improperly used or from tools which have been abused or badly worn. Eye protection, through the use of safety goggles or hood MUST be worn for any Job involving the use of tools, particularly when using air hammers.**

**WARNING:** Always wear safety goggles and any other safety equipment that is deemed necessary for your application.
